## Professional Summary

Data Analyst / Business Analyst with internship experience in data cleaning, data validation, Excel, Pivot Tables, SQL, Python, Pandas, Power BI, and data visualization. Skilled in KPI analysis, reporting, dashboard development, exploratory data analysis, and converting raw data into actionable business insights. Familiar with Power Query, DAX, Generative AI, LLMs, RAG, AI agents, APIs, n8n workflow automation, Agile/Scrum, SaaS, and SDLC.

## Technical Skills

**Data Analytics:** SQL, Excel, Pivot Tables, VLOOKUP/XLOOKUP, Python, Pandas, NumPy, EDA, Data Cleaning, Data Validation, Data Transformation, Basic Statistics, KPI Analysis

**Data Visualization & BI:** Power BI, Power Query, DAX, Tableau, Dashboarding, Business Intelligence, Data Storytelling, Reporting, KPI Dashboards

**AI & Automation:** n8n, Workflow Automation, Generative AI, LLMs, Prompt Engineering, RAG, Embeddings, AI Agents, APIs, Webhooks, Tool Calling, Structured Outputs

**Business Analysis:** Requirements Gathering, Stakeholder Management, BRD/FRD, User Stories, Use Cases, Acceptance Criteria, Process Mapping, Gap Analysis, Root Cause Analysis, UAT, Agile, Scrum, SDLC, SaaS

## Experience

**25XGlobal**

**Mar 2026 – Present**

*Data Analyst Intern / Work From Home*

*Internship*

- Cleaned and validated business datasets using Python Pandas by handling missing values, duplicate records, inconsistent data types, and data quality issues.
- Used Excel, Pivot Tables, VLOOKUP/XLOOKUP, filtering, sorting, and aggregation to validate data and analyze business performance.
- Used Pandas for data transformation, filtering, grouping, merging datasets, date handling, and preparation of analysis-ready data.
- Created Power BI dashboards and visualizations to track KPIs, trends, business performance, and analytical metrics.
- Supported Power BI reporting by preparing datasets, creating visualizations, and presenting structured insights for business decision-making.

## Projects

**Hospital Operations & Business Analytics Dashboard**

*SQL, Python (Pandas), Excel, Power BI, Power Query*

- Analyzed hospital patient, appointment, admission, doctor, and billing data to identify revenue trends, patient volume, operational bottlenecks, and department-level performance.
- Used Excel for data validation to detect duplicates, missing values, invalid dates, and billing inconsistencies before analysis.
- Cleaned and transformed datasets using Python Pandas, including missing-value handling, duplicate removal, date standardization, validation checks, and derived metrics.
- Used SQL to analyze revenue, appointment status, doctor utilization, waiting time, cancellation rate, patient spending, and departmental performance.
- Built an interactive Power BI dashboard using Power Query to visualize hospital KPIs, revenue trends, patient activity, waiting time, and operational metrics.

**Bizlytics AI – AI Business Advisor | Live Demo**

*SaaS, Generative AI, LLMs, RAG, Prompt Engineering, APIs*

- Built an AI-powered business advisory solution that analyzes business problems and converts structured inputs into actionable recommendations, KPI insights, and potential growth opportunities.
- Designed analytical workflows covering problem identification, KPI analysis, trend interpretation, growth opportunities, and recommended next steps for business decision-making.
- Applied prompt engineering, RAG, structured outputs, LLM concepts, and APIs to improve the relevance and consistency of AI-generated business analysis.

**AI Chatbox Automation – n8n**

*n8n, Generative AI, APIs, Webhooks, Workflow Automation*

- Built an AI-powered chatbox automation workflow using n8n to receive user queries, process requests through AI services, and return automated responses.
- Connected webhooks, APIs, workflow nodes, and AI components to automate message processing and response generation.

**Customer Sales & Performance Analysis**

*SQL, Python, Pandas, NumPy, Excel*

- Analyzed customer, product, and sales performance using SQL and cleaned and validated raw datasets using Python, Pandas, and NumPy.
- Performed EDA to identify sales trends, customer segments, product performance, and key business KPIs.

## Education

**Lakshmi Narain College of Technology Excellence**

**Bhopal, India**

*B.Tech in Computer Science & Engineering; CGPA: 6.5/10*

*2022 – 2026*

**Kendriya Vidyalaya No. 2**

**Chhindwara, India**

*Higher Secondary Education (Mathematics); 76.6%*

*2021 – 2022*

## Certifications

**Microsoft** – Microsoft Certified: Power BI Data Analyst Associate

**AWS** – Data Engineering on AWS: Foundations (2026)

**Deloitte** – Data Analytics Job Simulation, Forage (2025)
